**Future's Past**

**(Development)** PCs can use this laboratory to teleport up to six creatures and their equipment to the receiving pad (Area 3.5) with a DC 15 Engineering check. Failing the check by 5 or more deals 5d6 damage as the creature's atomic structure is partially atomized.

**(3.4) EMERGENCY EXIT**  
This area functions as Area 3.1, except there is no drone emitted within and the seal covering the exit to hard vacuum has already been broken. Opening the door to this area risks getting blown through the hole, and expelled out into space, though the door is significantly harder to open, requiring a DC 35 Strength check.

**(3.5) ACCOUNTS RECEIVABLE**  
This area appears similar to Area 3.3 and includes another pad for receiving or sending teleported individuals (see Area 3.1 for details).

**(3.6) INTRACET**  
Banks of active techno-organic equipment loom over two seats formed from pulsating, fleshy tissue. The backs of the chairs slope up to form a dome of hanging, nuclear-covered tentacles.  
While time travel theories allow for the projection of matter forward and backward, the drow have not yet mastered that level of precision. They've found it to be far easier to instead project information, such as consciousness and memories. This laboratory was purposed with perfecting the technology allowing for the transmission of memories or even a full exchange of minds.  
**(Development)** A PC succeeding on a DC 15 Engineering or Life Science check can use the drone equipment to form a mind link between any two creatures sitting in or strapped to the chairs. This link can be two-way or one-way. An unwilling creature requires a DC 15 Will save. On a successful save they are immune to this effect for 24 hours.  
With a DC 20 Engineering or Life Science check, two creature's minds can be exchanged. The creature's minds retain all mental ability scores (Intelligence, Wisdom, and Charisma), class features, feats, skills, supernatural abilities, and spell-like abilities. The bodies retain all physical ability scores (Strength, Dexterity, and Constitution), extraordinary abilities, and equipment. Drone infection is a physical malady and remains with the host.  
**(Story Award)** PCs figuring out a way to use the equipment to their advantage gain an additional 200 XP.

CONTENT FOR USE WITH FANTASY GROUNDS VTT

Rise of the ghosts expansion review. Rise of the drow 5e review.

The following portal might be of help for those looking for additional game encounters within the underworld of Aventyr! Underworld is on the rise of the drow If you find any bug / bugs within the rise of the edition of Drow: Collector's Edition for fantasy grounds, send them to [Protected Email] so Rob2e can solve them. The maps are simple (full color) but very practical, and I generally like them. For example, the introduction mainly assumes that PCs win all battles and are successful in all encounters. The campaign starts with a kind of introduction, which to my understanding didn't exist originally, but it was added later, and it feels less refined and more generic. Personally, I don't like this approach, but I know it's pretty easy to adjust the campaign as well. Also the use of the tools seems very professional. Adventures to be conquered. The later content often has some guidance on this and also what the "enemies" will do, if they survive. July 7, 2021, 01:01 #2 Thanks for the review @maetco! I love constructive comments / reviews, we can use it to enhance each and every adventure we produce. The "encounters" are designed with the idea that (random) combat is a key part of the DND. Rybalka, the heart of the Stoneholme border, City of Ancestors - Embla, City of Lights Holioth, City of Spiders Gullion House and all the Drow houses of Toloth Unique venues to discover. Not all plots or correct, creating manual labor for the GM. There is very little no role-playing, exploring, getting the feeling of the land, etc. The darkness comes to the darkest dawn, the darkness revealed descent into the underworld, the scourge of Embla usurping the souls commanding the cities of malice to explore. Thank you! Almost a decade in the The rise of the Drow: the edition of the collector is the most extensive and detailed book of the adventure and the consequent one. What should happen if they do not, it is not usually explored. Especially in an intro, this is problematic, since it doesn't always make much sense. This makes it probably quite easy to run by less experienced GMs, but it can also feel a bit mechanical (rail roady). Take your game even deeper! Create a deep and expansive Underdark campaign right for your group. Updates are patched every Tuesday. Page 2 Unfortunately, these are not always in the most logical places, type of encounters. But in the end, GMs who like the other kind of encounters more, need to create some content themselves. January 22nd, 2021, 18:51 #1 Disclaimer à Purchased Rise of the Drow to use it as a covert campaign, for other use in mind the mileage may differ significantly. The background information of the bad guys' plans may be at the end of that section, or somewhere in between. Once you get to the main part of the campaign, the materials become more complete. Location is a good place to have it too, because it's often a special moment of the campaign where everything comes into play, but it would be more logical to use a coherent structure and start with the background information and then have links to it later in the campaign at the appropriate locations. So the GM must definitely create stronger hooks for the PCs to follow the yellow brick path than what is given in the materials. But not everything is perfect. There is a lot of content to support the running of the campaign. Summary: 6,5/10 Pros: + Can be used as a campaign, toolbox for your own campaign or as a source of inspiration and additional content for an existing campaign + Generally it has a lot of content + The implementation of FGU is great, including large maps using LoS tools very well + Nice meta-content to run the campaign by on how to establish the state of vernal suitable for a Cons scene: à € œThe quality of the campaign is well at best and in the worst à € "much of the content is left at the level of an idea, in place to refine and deepen it in a à «turnkey» hand » - The storyline and plot of the campaign is something that a good GM could come up in 10 minutes, many of the great aspects are also easily very problematic to execute in practice; There are many ways to "break" and the book doesn't offer many solutions for these moments, more detailed but random thoughts: the design is very structural, which means it's like step 1, step 2, step 3. For example: sections with summary Information on different topics, goal guide on what the topic/environment should be and how to support it, and campaign synopses/chapter. Much of the content is designed to be completely optional, and some partially optional. Not only the basic tools (such as walls and doors) have been used, but also the more complex tools (such as land and windows). The following books are recommended, but are not required to play with the rise of the drow: the races and classes of the underworld, the hidden secrets of the underworld, the survivor's guide for spelology. By this I mean, almost all of the content of Semi-Scripted, which is not directly related to the story, is combat. Many of the encounters also add a layer to the overall history or the world edifice, so they are not just about combat. The implementation of FG is mostly good. Spells & Subdark Domains BESTIARIA BESTIARIA Standards and Expansion Expand your DROW Campaign BUY THE PURCHASE OF THE PURCHASE OF THE DROWORLD DERUCTILES. Increase the set of drow: Pawn, or the digital map and the token pack. The campaign often assumes that the PCs would want to automatically do it on an ongoing basis, which is prepared for them. Settlements in the underworld unleashed the Glorious Forest Graveyard Goryyard Gorithad GRANITESHHELLHOLME JORUMGARD LAKE VAIHTULOHKAARMEARME LAKE XLEKELLUM EL OSUBE PETRÀS LAIR PURPLE GUANTERY Applicants waste the small, shadowy void Survey Expedition XL-17B Venom Vethin's demiplane. Keep Saturnalia accessories Saturnalia from Tahiti for your campaign. On the other hand, the It is designed with an idea of combining three elements together: story-prepared events, optional guide events and random encounters. There are many links to relevant materials, the maps have GM and Player versions, using the player version as a preview image, the NPCs are made using the proper tooling, etc., etc.
